FI INTERNAL FIZZ TECHNOLOGY

Innovative dispensing and carbonating system for still beverages (wine, juice, still beer, still cider, cocktails etc ...), chilled in Bag-In-Box inside the appliance. The chilled beverage is then made sparkling inside the appliance during dispensing.

KI INTERNAL KEGS

Dispensing system for sparkling beverages (beer, cider, sparkling wine) contained in pressurized kegs that are chilled inside the appliance.

PI INTERNAL PUMPS

Dispensing system with internal pumps for still beverages (wine, juice) in Bag-In-Box; the beverages are chilled inside the appliance.

F FIZZ TECHNOLOGY WITH PASS-THROUGH COOLING

Innovative dispensing and carbonating system for still beverages (wine, juice, still beer, still cider, cocktails etc...), contained in Bag-In-Box or tanks placed at Ambient Temperature outside the appliance.

Cooling occurs instantaneously by passage through the internal coils of the appliance. The chilled beverage is then made sparkling inside the appliance during dispensing.

K EXTERNAL KEG WITH PASS-THROUGH COOLING

Dispensing system for sparkling beverages (beer, cider, sparkling wine) contained in pressurized kegs placed at Ambient Temperature outside the appliance.

Cooling occurs instantaneously by passage through the internal coils of the appliance.

P EXTERNAL PUMPS WITH PASS-THROUGH COOLING

Dispensing system with external pumps for still beverages (wine, juice) contained in Bag-In-Box or tanks placed at Ambient Temperature outside the appliance.

Cooling occurs instantaneously by passage through the internal coils of the appliance.
